Profile

- Full Stack Developer with a strong work ethic who has built responsive and effective online applications with tools like React, Node.js, and Express.
- With a strong emphasis on producing high-quality code and user-centered design, this developer is proficient in both frontend and backend development.
- Eager to learn new technologies and develop solutions that improve user experiences and propel company growth.
- looking for chances to contribute to creative projects and advance my skill set.

Experience

Full Stack JavaScript Developer

Golden Technosoft

Kathmandu, Nepal

Jun 2024 – present(2025)

- Developed and maintained responsive web applications using React.js and Next.js, ensuring optimal user experience across devices
- Implemented dynamic routing and server-side rendering with Next.js, improving website performance and SEO
- Led frontend state management with Redux, optimizing responsiveness and interaction flow
- Developed secure authentication and authorization systems, safeguarding user data and enhancing system integrity

Projects

Artisan Nepal

(Next.js, PostgreSQL, Supabase, NextAuth, Docker, Prisma)

doko-lake.vercel.app [🔗](#)

- Built and deployed a server-side rendered marketplace using Next.js for better SEO and fast performance
- Integrated Supabase with PostgreSQL to handle user data, product listings, and real-time interactions
- Implemented authentication and authorization via NextAuth for secure account handling
- Used Prisma ORM for structured and type-safe database operations
- Designed a user-friendly UI for posting, browsing, and bidding on handmade and secondhand products
- Containerized the application using Docker for consistent development and deployment
- Structured backend APIs and optimized queries for performance and maintainability

Forest Sports Arena

(React, Redux, Express.js, MongoDB, Framer Motion)

forestsportsandrecreation.com [🔗](#)

- Developed interactive UI with React and Redux for smooth court booking and blogging functionality
- Integrated animated transitions using Framer Motion to enhance user engagement
- Built RESTful APIs with Express.js and MongoDB to manage bookings, blogs, and user data
- Designed modular Redux architecture to manage complex state interactions efficiently
- Implemented booking validation and time-slot availability checks on both frontend and backend
- Optimized data fetching and UI responsiveness for better user experience
- Participated in feature planning and contributed to frontend/backend coordination

BusinessSathi

ERP System

(React, Node.js, Express.js, MongoDB, Docker)

- Developed new ERP modules in React by referencing and extending existing UI and logic
- Implemented business-wise data isolation to support multiple businesses under a single system
- Created dynamic role-based access control for different user types and privileges
- Designed analytics dashboards with ChartJS for tracking sales, inventory, and performance
- Integrated user upgrade system to handle tier transition and premium feature access
- Enhanced form validation and state handling for better user experience in complex forms
- Added reusable components to maintain consistency across modules
- Optimized API consumption and error handling across frontend modules

Skills

Languages: JavaScript, TypeScript, Java

Frontend: Antd, Next.js, React.js, Redux, Tailwind CSS

Backend: Express.js, NextAuth, Node.js, Spring Boot

Database: MongoDB, MySQL, PostgreSQL, Supabase

Tools & Others: Chart.js, Cloudinary, Docker, Git, Prisma

Languages

English – Full professional proficiency

Nepali – Native proficiency

Soft Skills

- Strong problem-solving and debugging abilities
- Effective communication and teamwork skills, developed through collaborative projects
- Excellent time management and ability to handle tight deadlines

Education

Kalika Manavgyan Secondary School

2018 – 2020

Higher Secondary Education (+2), Management

Butwal Kalika Campus, Tribhuvan University

2020 – 2025

Bachelor of Computer Applications (BCA)
